

Hyaluronic Acid
Synonyms: Hyaluronic Acid
Cas No: 9004-61-9
MF: C₂₈H₄₄N₂O₂₃

Specifications:

Item	Standards
Character	White Powder
CAS	9004-61-9
Molecular Weight	3,000 Da – 2,000,000 Da
Loss on drying	10.0% Max
Heavy metals	20ppm Max
Package	25kg/Fiber Drum with double plastic container inside
Storage	Store in a well-closed container Away from moisture.

Product Application:

- 1.Hyaluronic acid is a substance that is naturally present in the human body. It is found in the highest concentrations in fluids in the eyes and joints.
- 2.The hyaluronic acid that is used as medicine is extracted from rooster combs or made by bacteria in the laboratory.
- 3.Hyaluronic acid is also used as a lip filler in plastic surgery.It is also using to prevent the effects of aging.
4. Hyaluronic Acid (HA, Hyaluronic, Cyclic Acid) is a critical component of the skin that helps to retain moisture, keeping the skin firm, and preventing wrinkles by adding volume to the skin.

Product Description:

Hyaluronic acid supplements are made using synthesized forms of a compound that naturally occurs in the body. Classified as a polysaccharide (a type of carbohydrate), hyaluronic acid occurs in high concentrations in the skin, joints, and eyes, where it provides lubrication and sustains tissue hydration. Since hyaluronic acid levels decrease as you get older, hyaluronic acid supplements may help treat or prevent aging-related health conditions.
